Handmade American Quilt Furniture

QDP

Putting your quilts on display
Quilt Display Products

Our Story

The formation of QDP is a simple story. I was a semi-professional woodworker for more years than I care to remember when in 2009 my wife, KayEllen, decided to start quilting.

I would follow her around as she shopped at quilt stores looking for fabric. I, on the other hand, could be found examining the displays and store fixtures because wood is my fabric so-to-speak.

I started asking the shop owners if their customers ever inquired about quilt stands or other items on which to display their quilts. The typical answer was "Yes". I would then ask if they had a source for this type of product and most often the answer was "No", at least not reliably.

I heard this often, so I started thinking about providing these types of products to the general quilting population, not just to the local shops. There wasn't a "go to" brand that I could find that had national status...so why not be the guy to develop it?

QDP was founded in April 2012 with the intent to develop a national brand selling quilt display products, hence the reason for our name Quilt Display Products. From the start, I wanted QDP to be the brand that came to mind when displaying your quilts. My wife and I have been working hard to make that happen ever since.

It took a little over a year to design our first line of products, get our website on-line, and build a trade show display that we could haul around the country to promote our brand. Our first order was placed on our website in June 2013, and the orders have been coming in ever since. Thanks to all of you who have ordered, and to all of you who plan to order. QDP will be here to serve your quilt display needs!

Happy Quilting!

Steve Gebhart
Founder and Owner of QDP

Our Cause

QDP donates 2% of every order to the Cancer Research Institute which funds the advancement of immunotherapy treatment for all types of cancer. We feel strongly that no one cancer type should be singled out for funding and that personalized immunotherapy treatment is the present and future technology for treating this disease and improving the lives of those affected. Everyone at some point in time will be directly or indirectly touched by this disease, which makes finding a treatment and cure so important. Please visit CRI's website at www.cancerresearch.org to learn more or to make an additional donation.

Our Products

The best products come from the best wood. That's why QDP only uses the highest grade sustainable North American hardwoods that we can find. We design our own products, make every wooden part that goes into them, and professionally finish them with the latest technology materials. We pack them and ship them directly to you, cutting out the middle man and distribution centers. For this reason alone, it takes a little longer to fulfill your order, but we guarantee that when we do, you will be 100% satisfied. If not, we will do everything that we can to resolve an issue at no cost to you at all.

Dimensioning

Throughout this catalog you will see the term Display Width. We define this width as the actual usable space that can be used to display your quilts. The Overall Width will be the Display Width plus any additional, non-displaying dimensions of the product. For mini-hangers and shadow boxes, the Display Width indicates the recommended quilt block size.

Guarantee

Our guarantee is very simple. If you are not completely satisfied with your order, neither are we. Therefore, we will do whatever is necessary to resolve any issue you may have, including paying for the return or exchange of any part of your order, no questions asked.

Styles

The furniture styles listed below have been popular choices for many years. This popularity is because the designs are timeless, recognizable and work well in virtually any room arrangement. Other less popular styles exist, such as Transitional, Cottage, Rustic and Southwestern. As we develop new products, we will focus on styles that are appropriate and trending both in design and color.

Mission

Mission Style furniture is based upon the idea that simplicity in both design and material will allow the quality of the craftsmanship to shine through. This style of furniture is organic and straight-lined without curves or ornamentation. The pieces are bold, solid and heavy, made traditionally with Quarter Sawn White Oak, ammonia fumed to shades of brown. We offer our Mission Style products in the traditional wood and color choices but use today's finishing technology. Other woods and finishes are available as well, which allows this style to transition into a Southwestern environment because of its organic design and size.

Shaker

Plainness, practicality and pride describe the Shaker Style of furniture. Readily available, locally harvested timber, such as Maple and Poplar were commonly used in the construction of Shaker furniture. This style of furniture is often seen in warm organic reds, blues, yellows and greens and is sometimes left natural. We offer it that way, but have expanded the wood and finish choices to better augment the colors and textures of your quilts. Shaker Style furniture transitions well into Cottage Style when finished in a solid color, especially white.

Contemporary

Clean, gently rounded or rectilinear features are common in this style of furniture. Contemporary furniture works well in any room style you may now have, and when combined with your colorful quilt, will bring sharp focus to your work. A myriad of woods and finish choices make this a popular style, appropriate for any setting or to display any quilt, modern or otherwise.

Our Production Process

Every QDP product goes through eight phases of production. This is a cyclic process that starts and ends with you. Since each product we produce is handmade to your requirements, it can take 2 to 4 weeks for you to receive it. Since this is a long time by today's standards, we will inform you about your order as it enters various phases of production. We want you to be as much a part of the process as we are and this is our way of keeping you involved.

1. Placing Your Order

On our website, you can customize a product solution that best fits your needs, including the furniture style, the wood and finish, and the size. **Once your order is placed, you will instantly receive an acknowledgement email summarizing your order.** This event triggers a process in our system that puts together a product document package that will follow your order through the entire manufacturing process.

2. Raw Materials

The physical production process begins with the selection of the material required for your order. Each piece of wood is handpicked from our rough lumber inventory and then screened for defects, color and suitability of use. We then let it acclimate in the production environment for a couple of days to balance the moisture content. Only the best grade and best part of each board is used. We are so selective, that only about 75% of the material passes our selection process. The rest is recycled, used in our smaller products, or for prototypes of new designs.

3. Rough Cutting

The next phase of the production process is what we call rough cutting. This is where we prepare each wooden part in your order by cutting it to its approximate length and width. Each piece is then jointed perfectly flat and planed to an even thickness. It is then set aside to relieve the internal stresses caused by these machining processes. **We will send you an email when your order has entered the manufacturing phase.**

4. Final Machining

Once the stresses in the parts have been relieved, they are machined to their final dimensions. Holes, mortises, tenons and aesthetic features are machined into the parts with care taken to orient the best grain and surface features to the most viewable surface. This is a visual process, often overlooked in a high volume automated production facility.

5. Assembly and Prep

After the individual parts have been machined, some will be combined into sub-assemblies that will later be combined with other parts or sub-assemblies to form final assemblies. Parts are manually joined and hand-fitted, then glued and clamped together to cure. Before and after these activities, the parts are sanded in order to receive the finish. This is an important step, because the quality of the finish will only be as good as the quality of the wood preparation, including the detection and correction of any defects.

6. Finishing

Each individual part or assembly to be finished is cleaned to remove all dust particles and then pre-treated to fill the pores of the wood. After this pre-treatment, the pieces are once again sanded and cleaned in preparation for the application of several coats of tinted lacquer. Finally, a clear protective finish is applied and buffed for durability. Several days of curing are required at this stage of production to insure that the finish is durable enough to be handled and packed. ***We will send you an email when your order has entered the finishing phase.***

7. Packing

This phase of the process is where each product is carefully wrapped with finish-friendly foam and bubble wrap and then packed into a cardboard box strengthened with foam. We will place a copy of your order, assembly instructions, all necessary hardware and tools if required, and any additional material in a durable pouch packed alongside your product.

8. Shipping

The last phase of the cycle is where we place your order into the hands of United Parcel Service where it is shipped directly to you by ground service. ***At this point, we will send you a shipping notice and tracking number, so that you can follow your order from our facility to your door.***

Quilt Stands

Mission

These distinctively styled quilt stands provide three rails at two different heights. We have designed these stands to be extra high, so that your larger quilts can be displayed up and off of the floor. This is a very substantial stand, heavy enough to resist toppling even under the heaviest loads, especially when ordered in Quarter Sawn White Oak.

Display Widths:	23, 29 and 35 inches
Overall Height:	36-3/4 inches
Overall Width:	Display Width plus 5 inches
Overall Depth:	14 inches
Shown:	35 inch, QS White Oak Dark

Shaker

These simple two rail quilt stands were inspired by a piece of furniture I saw displayed in a Shaker museum. The gently shaped ends add interest to the design without overpowering your quilts. These stands easily find a place in traditionally Shaker styled homes, but look equally good in Cottage styled rooms especially when finished in white or blue.

Display Widths:	26, 32 and 38 inches
Overall Height:	41-3/4 inches
Overall Width:	Display Width plus 3 inches
Overall Depth:	12 inches
Shown:	38 inch, Cherry Light

Contemporary

QDP's contemporary quilt stands provide three rails at three substantially different heights. You can drape smaller quilts on the lower rail and larger quilts on the other two. By arranging contrasting color and sized quilts side-to-side, front-to-back, and top-to-bottom, you can create some very intriguing and pleasing displays.

Display Widths:	26, 32 and 38 inches
Overall Height:	41-3/4 inches
Overall Width:	Display Width plus 3 inches
Overall Depth:	12 inches
Shown:	38 inch, Maple Clear

Judy from Georgia said...

"I wanted to let you know I received the quilt display stand Wednesday afternoon and put it together tonight--it is beautiful! The stand pieces were superbly wrapped and easy to put together. Cherry is my favorite wood and the beauty of the simple Shaker styling is timeless...I know I will enjoy the stand for years to come (as will my quilts!)."

Quilt Wall Hangers

QDP's quilt wall hangers are available with three different edge treatments: Mission, Shaker and Contemporary style. They are available in a wide variety of woods and finishes, and in lengths between 26 inches and 68 inches in 6 inch increments.

Display Widths:	26, 32, 38, 44, 50, 56, 62 and 68 inches
Overall Height:	2-1/2 inches
Overall Width:	Same as Display Width
Overall Depth:	1-1/2 inches

Picking the Right Size

In order to determine the right length hanger for your quilt, we recommend that you measure the width of the quilt on the side that will be hung, add two to four inches and then select a hanger that has at least that length. Keep in mind that you will probably want to change out your quilt from time-to-time, so think about the range of sizes that you might want to hang and select a hanger length that accommodates them all.

Shown: 44 inch, Shaker Style, Cherry Light

Easy Hang Wedge Lock System

The easiest way to install your quilt on a wall hanger is to do it off-the-wall. This way, you aren't fighting gravity and won't require the assistance of an extra set of hands.

Our unique wedge lock system is designed to do just that. Separate the front and back halves of the hanger, place your quilt in the groove, and reconnect the halves on a convenient flat surface.

Wedges on the back of the hanger simply slide over similar wedges attached to your wall (all of the hardware is included with your purchase). This eliminates trying to line up keyhole slots, nails or screws in a blind fashion. Simply slide the hanger on and off the wall with ease to change out your quilt as often as you like.

Virginia from New Mexico said...

"I just want to thank you for the beautiful quilt hanger. It works perfectly and was easy to install. I was especially impressed with your emails that kept me informed of the production status of the hanger. I am not a quilter but my fiber arts guild made a beautiful quilt for me and I am now able to hang it where I can admire it daily."

Quilt Shelves and Wall Racks

QDP's quilt shelves and racks come in three basic styles, Mission, Shaker and Contemporary. Each is available in three different lengths and a large number of woods and finishes. Just like our wall hangers, these shelves and racks attach to your wall using our Wedge Lock system, making them easy to put up. None of our shelves or racks require any assembly and all of the mounting hardware is included with your purchase.

The rails from which you hang your quilts are rectangular by design, providing exceptional strength in one direction. They will never sag like a round wooden dowel will. Also, all of our rails are loose, so if you want, you can sleeve the back of your quilt and slide it over the rail and onto the shelf or rack. If you don't want to sleeve your quilt, there is plenty of room behind the rails to allow for multiple folds.

Mission

Our Mission Shelf is designed as a companion to our Mission Quilt Stand, but works very well all by itself. The generous shelf offers plenty of space for knick-knacks and the slatted back distinctively fills the space behind with eye pleasing detail.

Display Widths:	32, 36 and 40 inches
Overall Height:	21 inches
Overall Width:	Display Width + 4-1/2 inches
Overall Depth:	5 inches
Shown:	40 Inch, QS White Oak Light

Shaker

Our Shaker Rack was inspired by the traditional Shaker Peg Rail and Hanging system. The Shakers didn't like clutter and kept things off the floor on the peg rail when not in use. The old adjustable candle holder is what inspired this design. The rail can be placed at one of three heights and its holders can be moved between pegs, giving you a number of display options. Unused pegs can hold a small basket, wreath or other item.

Display Widths:	27, 33 and 39 inches
Overall Height:	14-1/2 inches
Overall Width:	Display Width + 9 inches
Overall Depth:	3-7/8 inches
Shown:	33 inch, Cherry Dark

Contemporary

QDP's Contemporary Shelves offer a simple solution for hanging your quilt and displaying some treasured items as well. The shelf spans the entire length of the hanger, offering plenty of space. Simple rounded corners soften the design, and the compact appearance doesn't look heavy on your wall. This shelf could easily transition into Cottage Style if purchased in White or Blue.

Display Widths:	28, 34 and 40 inches
Overall Height:	5-3/4 inches
Overall Width:	Display Width + 4-1/2 inches
Overall Depth:	4-1/2 inches
Shown:	40 inch, Red Oak Dark

Karen from Massachusetts says...

"This quilt rack looks beautiful and I'm sure my daughter in law will love it. Thank You very much!!!!"

Quilt Ladders

Quilt Ladders

Our Quilt Ladders are available in three widths in a wide variety of woods and finishes and stand 68 inches tall. Four rails provide plenty of room for your quilts, and felt pads protect your wall and floor. The base of the ladder protrudes a space-saving 12 inches from the wall, so it takes up very little floor space. The first rail is 15-1/2 inches from the floor. The other three rails are 12-1/2 inches apart.

Display Widths:	18, 24 and 30 inches
Overall Height:	68 inches
Overall Width:	Display Width + 2-1/2 inches
Overall Depth:	12 inches (approximately)
Shown:	18 inch, QS White Oak Dark

Here's what Linda and Jerry from Michigan had to say:

"We are absolutely delighted with the quilt ladder - the quality of the workmanship and the excellent packing for shipping were most impressive! I am taking a picture of my quilts on my new quilt rack and am sending it to all of my quilting friends. I am including your website and my strong recommendation for your products."

Linda from Massachusetts says...

"This is my first order from your company. The customer service has been first rate all the way and the product is of very high quality. Thank you for the promotion order and if I cannot use it, I will pass it along. It's so wonderful to find a small company with a targeted product that provides such excellent customer service and quality. Thanks again."

Duane and Alice from Indiana say...

"Your shipment came and it was in tip top shape. Thank you for the way you packaged it, wrapped up so tight. We do appreciate the care and quality it is. Thank you."

Quilt Shadow Boxes

Display a quilt block, mini-quilt or needlework in one of our white and black reversible Shadow Boxes. Hang them in pairs to add detail to an empty wall, or give one as a gift to display a personalized wedding, birth or quilt of valor block.

One side of the shadow panel is white and the other is black, so you can choose which background goes best with your block.

The quilt blocks are attached with fabric friendly Velcro™ and hang on your wall with our Wedge Lock Hanging System. Everything you need is included with your purchase.

Don't want to hang them on your wall? That's OK, they are wide enough to stand on a table or dresser top just as well.

Display Widths:	10 x 10 and 12 x 12 inches
Overall Height:	Display Width + 2-7/16 inches
Overall Width:	Display Width + 2-7/16 inches
Overall Depth:	1-3/4 inches
Shown:	10 x 10 inch, Cherry Light

Mini-Quilt Wall Hangers

Sometimes you want to display a block or mini-quilt on your wall instead of a full size quilt. QDP's Mini-Quilt Hangers were designed to meet this need. They work and attach to the wall the same way as their big sisters; only they are sized from 10 inches to 20 inches in 2 inch increments.

Display Widths:	10, 12, 14, 16, 18 and 20 inches
Overall Height:	1-1/2 inches
Overall Width:	Display Width + 1/2 inch
Overall Depth:	1-1/4 inches

Cindy from indiana says:

"The quilt hanger accents by quilt beautifully and matches my décor beautifully."

Finish

We use pre-catalyzed lacquer, tinted for all of our stains and solid colors, and un-tinted for clear coats. This is a durable, quilt friendly finish, similar to what you find on today's furniture and kitchen cabinets. You can clean any of our products with a soft cloth dampened in water or you can use commercially available cleaning products designed for use on furniture. We only offer wood and finish combinations that enhance the beauty of the finished product and will avoid combinations that we know will not be pleasing.

Poplar

This is a light and tightly grained hardwood. We only use this material for products that receive solid color finishes such as red, blue, yellow, green, white and black.

Maple

This hardwood is less dense than the Oaks, but with a tighter and less pronounced grain. The natural color of this wood tends towards shades of tan, ranging between light and dark. This wood can be tinted to mimic almost any other wood, but we elect not to do that and offer it with a clear coat finish only.

Sustainability

We only use sustainable, locally harvested and processed American Hardwoods in our products. The use of solid lumber, traditional joinery and modern finishes, insure generation after generation of use. Our shipping and packaging materials are recyclable, so keep that in mind when disposing of them.

Karen from Wisconsin says:

"I just wanted to say thank you again for the beautiful ladder I won at the Chicago quilt show. I was a little skeptical when I got the notice that I had won as I never win anything and there are so many scams out there. I just returned from a trip and have put my ladder together and have it in my sewing room. It is very nice. Thanks again."

Cherry

This hardwood is also less dense than the Oaks, and like Maple, has a tighter and less pronounced grain. The natural color of this wood tends towards shades of pink and red, ranging between light and dark. This wood will naturally darken with age, more rapidly when exposed to direct sunlight. This is a normal process and actually enhances the beauty of the product. We offer it in a light or dark finish.

Red Oak

This hardwood is not quite as dense as White Oak, but offers a strong, attractive grain pattern that works well with larger pieces of furniture. In natural form, this wood comes in shades of tan with a reddish tint and highly contrasting and textured grain. We offer it in a light or dark finish.

QS White Oak

This hardwood is the king of oaks, especially when quarter sawn (QS). Cutting it from the log in this fashion extracts the natural beauty of the wood, exposing flecks and rays of its internal structure in a manner that is unique to this wood alone. You typically find this wood used in Mission Style furniture. We offer it in a light or dark finish as well.

*We know you are proud of your quilts.
So let us help you be proud of the way
you display them!*
